

Additional information

- The poster must be prepared before the opening of cfDNA 2019. The conference offers no service for printing or the like.
- However, pins for mounting the poster will be available free of charge.
- Available space on the poster board, for each poster, will be 100cm in width (horizontally) and 120cm in height (vertically).
- The poster should include the title, authors and affiliations, an introduction, methods, results, and discussion.
- The ideal poster is designed to (1) attract attention; (2) provide a brief overview of your work; and (3) initiate discussion.
- The text on the poster should be readable from a distance of 2 meters. Font size should be minimum 24. The text type should be sans serif.
- Graphs, tables, and figures should also be readable from a distance of 2 meters.
- It is recommendable that you bring hand-outs of your poster for interested participants.

Oral presentation

- We have planned for a limited number of oral presentations.
- Each presentation will be 5 minutes long.
- A committee will select speakers based on the abstracts.
- Please indicate if you would like to give a presentation.
